It's Hip to give back. Billions of people don't have access to safe drinking water. We want to change that. Buy a Hip water bottle and provide two days of safe drinking water to someone in need. waterforpeople.org

Hip, the new way to carry water, designed by the team who came up with **bobble**. Reminiscent of a hip flask, the shape is flatter than the standard water bottle, which enables it to be carried more easily in a bag or handbag. Hip is lightweight and available in 6 sleek colorways, Hip is BPA free, recyclable, reusable and dishwasher safe. be-hip.com

Chad Wentzel MADE

"I love the feeling of walking into a fantastically designed room, it is exciting to be a part of that as a designer. In my new collection, I am opening myself to experimentation - exploring the concept of color as a way to create new objects." - CW

Wentzel's work takes on vibrant, effortless forms. Appealing to both the minimalist and maximalist, designs such as the Lasso Light exude sophistication and whimsy. nextspacedetroit.com

Brilliance

1 **Desk lamp** with bronze base and black painted aluminum cone shade. Sweden, 1950s. 2 **Round table lamp** with enameled aluminum base and colored glass shades. NOMOS Petit Four wrist watch series in Matcha, Azure, Pearl and Grenadine Traditionally crafted by hand in Glashütte. Every individual movement is adjusted in six positions and features Glashütte ribbing, tempered blue screws and NOMOS perlage. In two of the four watches, the hand-wound caliber can be viewed at work through a sapphire crystal glass back. The two others, Tetra Matcha and Tetra Azure, offer space for a personalized engraving on their stainless steel backs. glashuette-original.com
