

Cameras

Click bait

"I bought myself a **Leica** as soon as I could and the cameras have been with me ever since," says acclaimed British snapper Terry O'Neill. To celebrate his love of the classic, the photographer has collaborated with the company to release the Leica MP "Terry O'Neill" Set, which reinvents the film camera in British racing green, with a cognac leather strap and a top plate signed by the man himself. And for a demonstration of the amazing photographs you could capture with the camera, each of the 35 sets includes a signed edition of one of O'Neill's never-before released images of Audrey Hepburn. As the photographer rightly observes, "When you use a Leica, you can never go wrong." www.leicastore-mayfair.co.uk

Stationery

Good impression

Nothing beats sending—or receiving—a handwritten letter. Next time you put pen to paper, make a stylish gesture and stamp a portrait of your residence. **Holly's Houses** will create an elegant line drawing of your property that it will then transfer onto a rubber stamp, either with or without your address below, with which you can adorn envelopes, gift tags, and more. Company founder and London-based illustrator Holly Anne Rolfe also produces beautiful watercolor house portraits. www.hollyshouses.co.uk

Watches

FREE(WAY) TIME

Four years in the making, the Autobahn timepieces from award-winning watch company **Nomos Glashütte** were designed in collaboration with acclaimed designer Werner Aisslinger. Inspired by vintage motorcars, the stylish Autobahn is available in three models—plain white, midnight blue, and a white and blue sports version—each of which features a seconds display in a concave dish, a date window that shows yesterday, today, and tomorrow, and, for nighttime, a luminous ring of large Super-LumiNova fields. www.nomos-glashuette.com
